Experience

AI Developer

Ernst@Work | October 2019 - Present

I am currently working as a student in Ernst@Work where I need to help develop different application and research on new AI topics.

Assistant Software Developer

TracingInMotion | May 2019 - December 2019

As a software developer I had to make Android applications for warehouse scanners and develop web applications in ASPX .NET

Production and Labo

Jackon | July 2018 - August 2018

My task consisted of testing samples of insulations and help in the production where needed.

SWAP responsible

Siemens PLM | July 2017 - August 2017

I was responsible for managing the SWAP in the summer, meaning I had to make the new devices work ready and wipe the old devices to go back to the factory.

Internship

IMAS nv | January 2017 - February 2017

For my internship I had to help at the service desk and I automated a process in Bash.

Education

Bachelor Applied Artificial Intelligence

KdG, Antwerp | 2017 - Present

Applied Computer Science

Immaculata Instituut, Oostmalle | 2011 - 2017

Achievements

1st place Hack The Future NLP

🏆 On the 28th of november, my teammate and I won the NLP challenge on the Hack the Future Hackathon
